

4100-LEV Level-Ease Monitor

Continuous level monitoring of liquids and bulk solids

Over 40 years of Arjay's field proven HF capacitance experience has been applied to the Level-Ease 4100 series monitors. This unique level system provides complete flexibility for monitoring one or more tanks in one complete package.

- unique capacitance approach eliminates routine cleaning
- no moving parts
- control and interface panel mounts safely away from the process

The Level-Ease 4100 sensing probe monitors the capacitance field between the probe and it's concentric shield of the tank wall. As the level of product increases, the probe capacitance changes. This level signal is used to provide outputs, displays and relay control.

up to 1 km

process connection

Probe with concentric
shield for non-metallic,
cylindrical horizontal or
fuel/oil applications

Probe shown with
inactive sheath

4100-LEV

Features and Benefits

- no moving parts
- remote electronics via standard twisted pair
- all set-up, calibration and diagnostics are accessed at the control panel
- all control wiring and interface is done at the control panel
- HF capacitance technology does not require routine cleaning
- touch screen interface for easy set-up and user interface
- tank view display for ease of reading
- trend display of hour, day or month increments

Optional Interfaces

Analog Output 4-20 mA non-isolated
Communication RS-485 Modbus

Technical Specifications - Control Panel

Operating Temp.	0°C to +55°C
Resolution	.007% (.07 pF at 1,000 pF)
Accuracy	0.2% of full scale pF
Power Input	24 vdc or 80-240 vac +/-10%, 1P, 50-60 HZ
Display	touch screen full colour tank view graphics, % and engineering units of level selectable trend line view or none
Relay Outputs	four SPDT, 10 amp @ 240 vac, dry
Enclosure	Type 4 metal painted blue / IP 66 optional Type 4X SS or polycarbonate

Technical Specifications - Probe

Process Temp.	-60°C to +200°C
Ambient Temp.	-40 C to +55 C
Pressure	103 bar/10342 kPA/1500psi at stable temperature
Process Connection	available threaded or flanged
Wetted Parts	316SS and Teflon

Certifications (certificates available on website)

Included Standard on Control Unit and Probe - Ordinary Location Use
UL/CSA/IEC 61010-1
CAN/CSA 22.2
CE

Included Standard on Probe - Hazardous Location Use - Explosion Proof
USA/Canada CSA Zone 1,2; AEx db IIC T5 Gb
IECEX/ATEX Zone 1,2; Ex db IIC T5 Gb

Optional on Probe - Hazardous Location Use - Intrinsically Safe
UL/CSA/IEC 60079
ANSI/UL 913-2013
Class I; Division 1,2; Groups A,B,C,D; T4
Class II; Division 1,2; Groups E,F,G
Class III; Division 1,2
Class 1, Zone 0,1,2; Ex ia IIC T4 Ga

Included Standard on Probe
CRN # 0F07450.2 (all provinces)
NACE MR-0175 Compliant where applicable

Probe Assembly

The Arjay PMC (pulse module circuit) installed at the probe converts the tank signals to a frequency pulse. This allows the controller to be safely mounted up to 1 km away from the tank with virtually no loss to signal stability. No operator interface is required at the probe using this unique Arjay PMC design.

Control Panel

All calibration, control interface and power wiring is done at the main control unit. The touch screen provides a simple menu-driven operator interface and display.

The Arjay App board is the heart of the 4100-LEV. This board monitors and controls the signals from the tank probe, applies the appropriate calibration algorithms and interfaces this information to the touch screen and PLC hardware.
