

Arjay Products in Hydro-Electric Plants

Level Controls

From the reservoir to in-plant oil and chemical storage, level transmitters and alarms monitor many applications

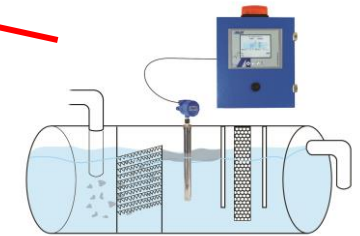

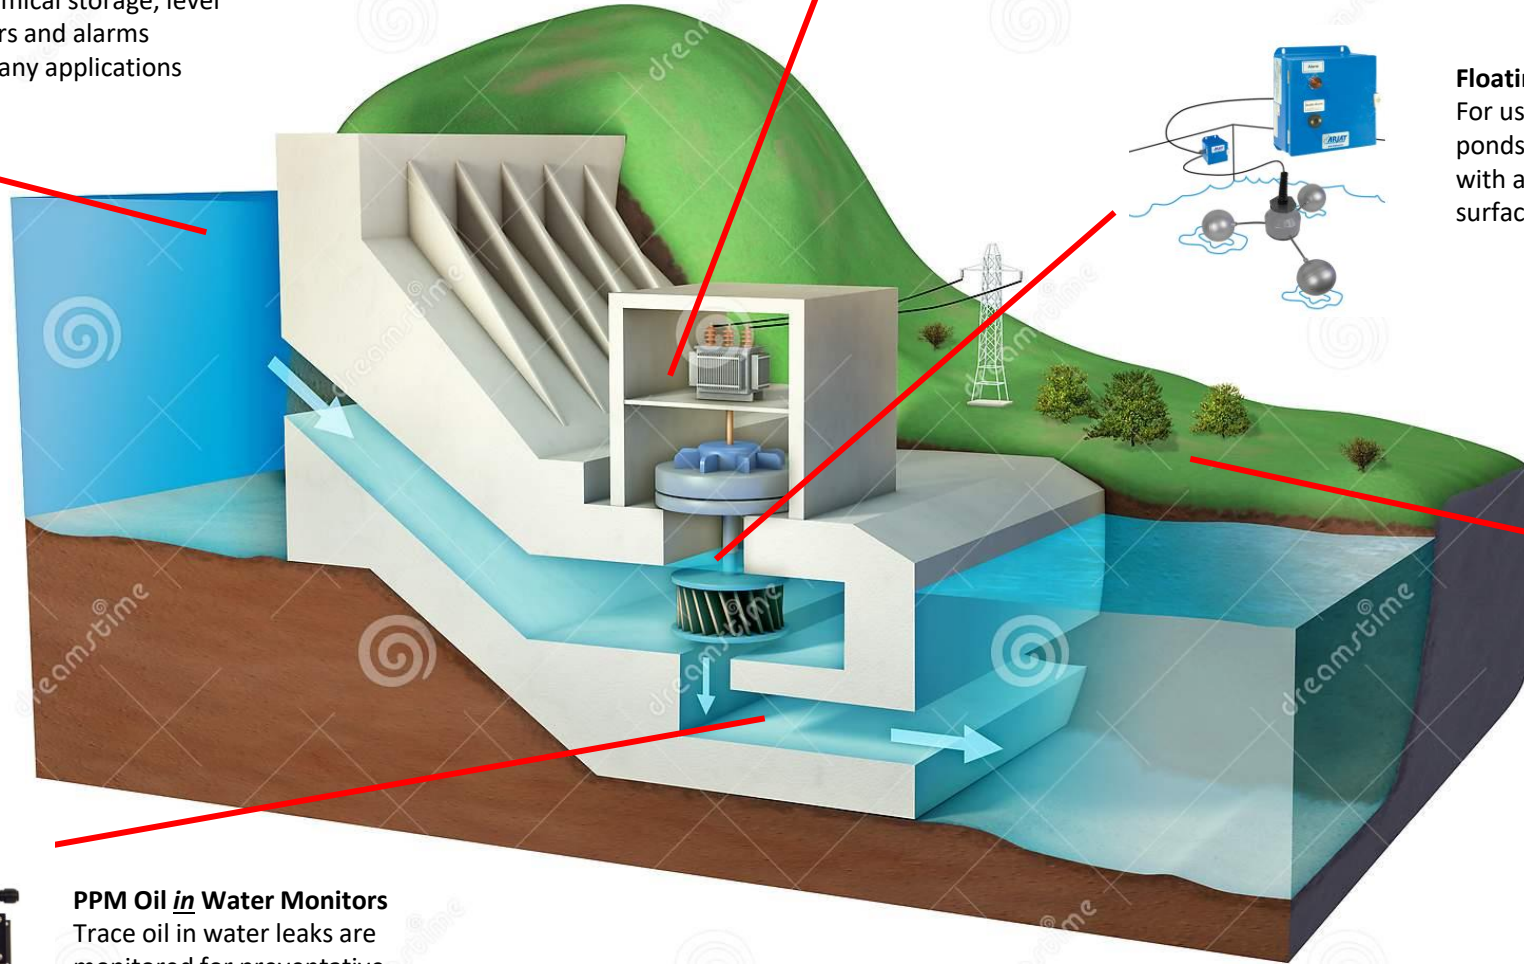

Area Leak Alarms

Sensor pucks around tanks and pumps, in electrical vaults....anywhere a normally dry condition may incur and need a liquid leak alarm.

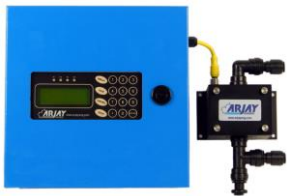

Floating Oil on Water Alarm

For use in sumps and open ponds, the floating sensor moves with and tracks the water surface for any oil accumulation.

Oil/Water Separator Monitors

Monitor the oil levels in your above or below ground separator to alert when pump-out is required. Models available with multiple setpoints for warning and system shut-down.

PPM Oil *in* Water Monitors

Trace oil in water leaks are monitored for preventative maintenance and environmental compliance.
